**SF09 EIA OF ROAD CONSTRUCTION**

Aspect of EIA	Will the road construction	Remarks
<b>Sources of Impact</b>	Require large volumes of construction materials to be taken from local sources (e.g. gravel, rock, water by dredging, quarrying, tapping etc.)?	
	Result in significant quantities of wastes or eroded material (dependent upon waste type, season of heavy rainfall)?	
	Require significant levels of accommodation of service amenities to support the workforce during construction (e.g. > 100 manual workers)?	
	Results in social changes (e.g. demography, traditional lifestyle and employment)	
	Require clearance of significant large area which will reduce allowable cut?	
<b>Receptors of Impact</b>	Be routed through areas that support conservation-worthy ecosystems, flora or fauna (e.g. protected areas, wilderness areas, wetlands, tropical forest, critical habitats, endangered species); or sites of historical or cultural importance?	
	Be routed across major drainage channels (rivers, canals)?	
<b>Environmental Impacts</b>	Present a danger to local populations due to a significant scale of traffic, e.g. heavy lorries, high frequency, transport at night)	
	Create barriers to the movement of conservation-worthy wildlife or livestock?	
	Present a pollution risk to portable water supplies, or to surface water bodies that support conservation-worthy or commercially significant fish, due to accidents during the transport of hazardous materials?	
	Lead to unplanned settlement or access to conservation-worthy ecosystems or natural resources (e.g. agricultural land, timber, minerals, squatter settlements)?	
<b>Mitigation Measures</b>	Be likely to require mitigation measures that result in the project being socially or financially unacceptable?	

**Other Comments**

**Conclusion**

Road construction should go ahead as planned. / Road construction should go ahead with the following changes:-  
/ Road construction should not go ahead.
